Career Objective

Experienced UI Developer with a B.Tech in Computer Science and Engineering, passionate about building scalable and user-centric web interfaces using modern front-end technologies, including React JS. Adept at working in fast-paced, collaborative environments with global stakeholders. Seeking an opportunity to apply my expertise to create high-quality user experiences while contributing to business success.

Experience (9 Years 3 Months as of February 2026)

Organization	Current Location	From	To
Tata Consultancy Services	Noida, Uttar Pradesh, India	Nov 2016	Now

Summary so far

Role & Responsibilities	User Interface (UI) Developer - Develop responsive website using: - HTML - CSS - Bootstrap - JavaScript - jQuery - LeSS, SASS - ReactJS - Work in agile environment & contribute to sprint planning and estimations. - Help in prioritizing requirements/user stories based on business inputs. - Collaborate and follow up with cross functional teams to achieve Release initiatives to successful conclusion. - Perform pre-release demos to customer.
Project Summary	- Currently working on live B2C website and handling the UI related features/bugs using SASS as the CSS framework and JavaScript and AEM related HTL. - Conducted an in-depth analysis of the Gigya login mechanism for the B2C website, gaining a clear understanding of the end-to-end flow from UI to microservices and back. Effectively documented and explained the complete process to the customer, ensuring transparency and alignment. - Have knowledge on React JS and developed personal projects using react js like Currency Converter and developed my own portfolio using React JS. - Worked on POC, where I have developed the UI of an application where multiple components were developed using HTML, CSS, Bootstrap and JavaScript. - Worked on the conversion of power-point slides and e-mails into HTML and applied various animations and functionalities to it using jQuery and JavaScript. - In my previous assignments, I have independently converted an existing application to responsive application using Bootstrap. - Worked with LeSS (CSS framework) and tailwind css for designing responsive website.

	- Developed various screens from UI perspective. Website has been live for a leading European Life Science customer. - Good hands-on for HTML, CSS, Bootstrap and have basic knowledge of JavaScript and jQuery. - Worked on a Live website which has to be redesigned completely from UI perspective where I have dealt with various animation effects as well. - Developed Emailers and Micro Sites for multiple projects of my domain.
Tools Used	Visual Studio, Brackets, Jira, GIT, Veeva Vault, Salesforce CRM.
